

# AffinityBots

Don't Hire... Create!

Build custom AI agents and agent teams in minutes—no coding required

Early Stage • Seeking Seed Funding • Beta Launch: Q4 2025

## Small Teams, Big Workload

Solo founders and small teams drown in operational tasks that pull them away from core business activities

## Tool Fragmentation

Existing AI tools are siloed—requiring multiple subscriptions, complex integrations, and constant context-switching

## The Hiring Paradox

Cannot afford to hire help, but cannot scale without it. Traditional automation is too rigid and expensive

# The Perfect Storm for AI-First Businesses

## Solo Revolution

AI enables single developers to build what once required entire teams. The era of the solo unicorn founder is here.

## Capital Efficiency

Build MVPs for under \$10K instead of \$100K+. Investors get more runway and faster validation with AI-native teams.

## Speed to Market

Launch in weeks, not months. AI agents handle customer support, sales, ops from day one—no hiring delay.

*"The best time to invest in AI infrastructure was yesterday. The second best time is now."*

# The AI Workforce Platform

AffinityBots is the operating system for your AI workforce. Build specialized agents for any role, coordinate them into teams, and deploy them anywhere your business needs them.

## No-Code Builder

Visual interface for creating and customizing AI agents

## 70+ Integrations

Connect to Slack, Google, GitHub, and more via MCP

## Team Orchestration

Multiple agents work together on complex workflows

## Internal & External Agents

### Private Assistants

Work alongside you for research, data analysis, task management

### Customer-Facing Agents

Deploy to website, social media for 24/7 customer engagement

### Specialized Teams

Multiple agents collaborate on complex multi-step workflows

### Team Orchestration

Coordinate multiple agents for complex, multi-step workflows

### One-Click Deployment

Monitor performance through comprehensive analytics dashboard

### No-Code Builder

Create custom automation flows without technical expertise

### Knowledge Integration

Equip agents with documents, websites, and custom data sources

### Agent Marketplace

Access industry-specific templates and pre-built configurations

### 70+ Integrations

Powered by MCP servers for limitless extensibility

# We're Not Competing—We're Completing

## ChatGPT/Claude

- ✓ Great for conversations
- ✓ Integration
- ✗ No automation
- ✗ No deployment options
- ✗ Confined to providers models

## Zapier/Make

- ✓ Good integrations
- ✓ Some AI reasoning
- ✗ Rule-based only
- ✗ Limited by triggers
- ✗ Too complex for most

## Custom Development

- ✓ Fully customizable
- ✓ Any Provider/Model
- ✗ Takes much longer
- ✗ Expensive (\$10K+)
- ✗ Requires coding experience

## AffinityBots: The Best of All Worlds

### AI-Powered

Intelligent reasoning

### Integrated

70+ platforms

### Model Agnostic

Integrate with any model

### No-Code

Anyone can build

### Deploy Anywhere

Internal or external

## Massive Growth Potential

**\$22B+**

Global workflow automation market by 2026

**70%**

Of companies now prioritize AI productivity tools

**Rising**

Demand for specialized collaborative AI agents

# The AI-First Team

Built in the era we're building for. One founder + AI teammates represents the new paradigm: lean, capital-efficient, and infinitely scalable.

FOUNDER

**Curtis**

Solo Founder & Developer

- ✓ Full-stack developer
- ✓ AI/ML enthusiast
- ✓ Product visionary
- ✓ Proven executor

AI DEV

**Cursor**

AI Development Partner

- ✓ 10x development speed
- ✓ 24/7 pair programming
- ✓ Code review & debugging
- ✓ Architecture guidance

AI ANALYST

**Perplexity**

Market Intelligence

- ✓ Market research
- ✓ Competitive analysis
- ✓ Customer insights
- ✓ Content creation

**The paradox:** We're proving solo founders can build the future by building tools that enable solo founders to build the future. **This is the team structure of tomorrow.**

## Where We Are Today

### MVP Built

Core platform functional with agent creation and deployment

### Early Beta

Small cohort of test users providing feedback

### Pre-Revenue

Focused on product-market fit

## 12-Month Vision

**1,000+**

Active users building AI workforces

**\$50K**

MRR from Pro and Enterprise tiers

**100+**

Pre-built workflow templates

**Launch**

Mobile app and enterprise features

# Multiple Revenue Streams

**Starter**

**\$29**

per month

- ✓ 10 AI agents
- ✓ 25 active workflows
- ✓ 10K Credits/day
- ✓ Community support

POPULAR

**Pro**

**\$99**

per month

- ✓ Unlimited agents
- ✓ Unlimited active workflows
- ✓ 100K Credits/day
- ✓ Priority support
- ✓ Advanced analytics

**Enterprise**

**Custom**

contact us

- ✓ Everything in Pro
- ✓ Unlimited messages
- ✓ Custom integrations
- ✓ Dedicated support
- ✓ SLA guarantees

## Additional Revenue Streams

Premium agent templates

Usage-based pricing

Integration marketplace

Training programs

## Seeking Seed Investment

We're Raising

**\$500K**

Seed Round

### Use of Funds

Product Development 40%

Marketing & User Acquisition 30%

Infrastructure & Hosting 20%

Legal & Operations 10%

### 18-Month Milestones

**1K+**

Active Users

**\$50K**

Monthly Recurring Revenue

**Series A**

Ready for Next Round

**5+**

Team Members

# 18-Month Roadmap

**Q3 2025**

Advanced analytics dashboard and expanded integrations

1

**Q4 2025**

Cross-agent collaboration and AI team optimization

2

**Q1 2026**

Mobile app launch and enterprise security features

3

# Don't Hire... Create!

Join the AI-first automation revolution transforming how businesses operate. Build the intelligent workforce of tomorrow, today.
